

F. Schmid reprints available

Agriculture Canada (=CNC=Schmid's employer in Ottawa) late last fall hired a collections manager. He is a good friend of mine (he had a 2 year postdoc 2 doors down the hall from me), and has been keeping me informed on his work with the minor orders up there. He has now had the Trichoptera offices (=2 small ones) cleaned up and gotten all the reprints in order (I visited him last week of March). He has 2 assistants working there part time, one making an inventory of all the types, the other curating the alcoholic material. The pinned material is in pretty good order. See Braueria 37 p.3 for Hans' comments on some of the material there. If you need borrow types, or other material contact: Dr. Owen Lonsdale, Collections Manager, National Identification Service (Entomology), K.W. Neatby Building, Central Experimental Farm, 960 Carling Ave., Ottawa, ON, K1A 0C6, Canada or

Owen asked me to help distribute excess reprints left over from Fernand: I have boxes in the next door office. The papers were published between 1964 and 1987; of one we have only 3 copies, others many (see below).

Let me know your needs and I will get them mailed out as long as they last. Make of list of desiderata including the year, and a short, distinctive title for identification. Be sure to include YOUR NAME AND FULL MAILING ADDRESS. I will send them out while they last.
